

Release Specification

Release Date: 15 Jan 2026 | **Source Repository:**

<https://github.com/weaviate/weaviate/releases/tag/v1.35.3>

1. System Architecture & Features

Weaviate is a cloud-native, open-source modular vector database built for scale. Release v1.35.3 features advanced hybrid search (BM25 + dense vector fusion via Reciprocal Rank Fusion), async indexing, filtered HNSW with Roaring Bitmaps, and multi-tenant sharding.

2. Benchmark Role in Table 9

Evaluated alongside PostgreSQL (pgvector) and Milvus in 3-engine cross-replication benchmark, demonstrating filtered vector search latency and recall across 0.1% to 50% selectivity regimes.
