

Architecture Card

Release: Qwen Team, Alibaba Cloud (2026) | **Model Card:**

<https://huggingface.co/Qwen/Qwen3.5-9B>

1. Model Architecture

Qwen3.5-9B is an open-weights large language model featuring 9 billion parameters, group-query attention (GQA), extended context length (up to 128k tokens), and optimized instruction-following reasoning.

2. Role in Benchmark Pipeline

Serves as the primary question-answering generation model (VLM Answerer stage) in RQ6 answer propagation experiments, receiving retrieved multi-modal evidence contexts to evaluate index approximation error propagation.
